

EMATec & MetFoam 2023

5-7 July 2023; Dresden / Radebeul

Wednesday, 5 July 2023

09:00	Welcome address		
09:30	PLENARY Ralph Spolenak (ETH Zürich) Additively manufactured nano-porous micro-scale Ag structures for SERS sensing		
10:00	PLENARY Pedro Nehter (Airbus) Additive Manufacturing of Lightweight Solid Oxide Fuel Cells for Aviation		
10:30	Coffee Break		
	EMATec AM Advanced Materials and Technologies	MetFoam Properties	Metfoam Applications
11:00	Fuad Osmanlic Industrial scale Additive Manufacturing using Electron Beam Powder Bed Fusion	Anja Mauko Impact behaviour of cellular metamaterial with axisymmetric chiral auxetic	Jorge García-Cañadas Heat-to-electricity energy conversion by means of thermo-electrochemical cells using metal foams
11:20	Eduard Hryha Impact of powder properties and powder reuse on additive manufacturing of copper	Hongfei Shen Capillary performance of bi-porous TiAl fabricated by reaction sintering with space holder	Norbert Babcsán High density and microcellular aluminium foams
11:40	Simon Rauh Laser powder bed fusion of copper-tungsten composite powders	Csilla Kádár Compressive Properties and Deformation Mechanisms in Various, Differently Manufactured Zinc-based Biodegradable Metal Foams	Viviana Marcela Posada Perez In vivo stability of diamond-lattice porous-Mg modified via directed plasma nanosynthesis
12:00	Christian Kukla Metallic Fused Filament Fabrication of Aluminium alloys	Sompong Srimanosaowapak Tailored Energy Absorption Properties of Open Cell Aluminium Foams via Different Porosities and Base Materials for Foam Filled Crash Box Design	Joachim Baumeister Sintered porous copper-zeolite composite plates for stacked modular adsorption heat pumps
12:20	Ohad Dolev Advantages of paste feedstock over loose powder in high volume green part manufacturing applications	Tillmann Neu Aluminium-Foam-Sandwiches – Correlation between foam structure and mechanical performance	Yoon Chang Jeong A novel pressure vessel with a TPMS structure
12:40	Rajkumar Singh Manufacturing of Critical Aerospace Components by 3D Printing and Post-Processing		Yoon Chang Jeong A 3D-printed main frame for convex-deformable mobile devices
13:00	Lunch		
14:00 – 18:00	Guided Tour to Fraunhofer IWU (Bus transfer to Chemnitz)		
	Break		
19:00	Welcome Reception		

EMATec & MetFoam 2023

5-7 July 2023; Dresden / Radebeul

Thursday, 6 July 2023

09:00	PLENARY Julia Carpenter (ETH Zürich) Hierarchically Porous Steel Monoliths with Ultra-High Surface Area and Self-Reinforcing Adaptive Properties		
	EMATec PM Advanced Materials and Technologies (I)	Metfoam Simulation	Metfoam AM
09:30	Johannes Trapp Novel Alloy Systems for Brake Discs from Aluminum Matrix Composites in Electric Vehicles	Merugu Rakesh Numerical Investigation on Deformation Behavior of Aluminium Foams with in situ Composite Particles	John Misiaszek Direct-Ink Writing of Hierarchically Porous Titanium for Enhanced Osseointegration
09:50	Niels Herter Application of an Innovative Tip Clearance System in an Electric Fan Engine	Anna Stręk Stress-strain behavior of porous metals using artificial neural networks	David Dunand 3D Ink Extrusion Printing of CoCrFeNi and (Zr _{0.50} Ti _{0.35} Nb _{0.15}) _{100-x} Al _x Microlattices
10:10	Sun Jinhua Synthesis and applications of graphene/metal composites	Xuezheng Yue Additive Manufacturing of High Porosity Magnesium Scaffolds with Lattice Structure and Random Structure	David Dunand Equiatomic CoCrCuFeNi and HfNbTaTiZr Microlattices via 3D-Ink-Extrusion Printing, Reduction and Sintering
10:30		Andrew Kennedy Digital design and mechanical, thermal and fluid flow simulation of regular porous metal structures based on a BCC packing model	Mandy Uhlig Opportunities of metal structures in Cooling Systems
10:50	Coffee Break		
	EMATec Magnets	Metfoam Manufacturing	Metfoam Applications
11:20	Torsten Mix Powder metallurgical concepts to manufacture soft magnetic components	Mahiro Sawada Optimization of pore arrangement to prevent the formation of deformation bands in porous metals with unidirectional pores	Yixiang Wang A self-controlling thermal medium
11:40	Konrad Güth Closing the loop for rare earth permanent magnets	Chonlada Domrong Tailored Porosities of Open Cell Aluminium Foams Using Different Tap Volumes of Water Soluble Templates	Linyuan Zhang Proton Exchange Membrane Fuel Cells without Bipolar Plates
12:00	Thomas Studnitzky Sinter-based Additive Manufacturing of Highly Efficient Electric Sheets	Manas Mukherjee Processing of in-situ aluminium foam-filled stainless steel tube with foam-tube bonding for enhanced crashworthiness	Ralf Hauser Sinter Paper for Energy Application
12:30	Lunch		
13:30	PLENARY Matthias Zeier (GKN Hydrogen) Decentralised energy supply and hydrogen storage in metal hydride		
	EMATec PM Advanced Materials and Technologies (II)	Metfoam Manufacturing	Metfoam Applications
14:00	Cristina Berges Boosting SOEC industrialization by advanced manufacturing technologies in metallic interconnectors	Georgy Kurian Kaladimadathil Optimisation of aluminium alloy composition for foaming using magnesium blowing agent	Heeman Choe "Microscale" Metal Foams for Energy Applications: Emerging Opportunities and Challenges
14:20	Maximilian Mungenast Heat treatment challenges for direct and indirect AM methods	Mark Atwater Porous Metals via Oxide Reduction: Simple Processing and Diverse Applications	Pengcheng Zhu 3D porous Cu for high-performing lithium-ion battery current collectors
14:40	André Schlott Thermal Management of Power Electronics	Jörg Weise Production of nanoporous metal structures by means of gas phase dealloying	Hartmut Göhler Development of energy efficient particle foam production tools by application of porous metals
15:00	Thomas Hutsch Metal Carbon Composites for Energy and Structural Applications	Willy Kunz Metal foams and cellular structures – the step from research to industrial scale	
15:20	Coffee Break		
16:00 - 18:00	Guided tour Fraunhofer Institute Center Dresden (bus transfer)		
	Break		
19:00	Conference Dinner		

EMATec & MetFoam 2023

5-7 July 2023; Dresden / Radebeul

Friday, 7 July 2023

	EMATec Hydrogen Technology	Metfoam Manufacturing	Metfoam Applications
09:00	Jannik Brumm Evaluation of different steels for additive manufacturing of metal hydride based hydrogen storage tanks	Yoon Chang Jeong Shellular reinforced by diamond-like-carbon	Nathan Nesbitt Battolyser Systems – Commercializing the Ni/Fe Hydrogen Battery
09:20	Marius Lau Hydride graphite composite materials for thermo-chemical compression of hydrogen	Claudia Drebenstedt Custom design to the application of open-cellular metal structures	Afsaneh Rabiei (extended lecture) Steel-Steel Composite Metal Foam Under Extreme Environment of Heat and Puncture Along With Their Welding
09:40	Thomas Rauscher AM and PM materials as novel electrodes for alkaline water electrolysis	Ninzheng Wang Comparison of aluminum foams fabricated by different casting methods	
10:00	Peter Hannappel CALPHAD modeling and experimental assessment of interstitial metal hydrides for hydrogen storage applications		Gunnar Walther Powder metallurgical modified metal foam for catalysis applications
10:20	Coffee Break		
	EMATec Energy Harvesting	Metfoam Characterisation	Metfoam Properties
10:50	David Dunand TiNiSn thermoelectric microlattices	Paul Kamm Predicting 3D Volumetric Properties of Metal Foams from 2D X-Ray Radiographs using a CNN-based Computer Model	Nejc Novak Hybrid Triply Periodical Minimal Surface (TPMS) metamaterials with enhanced mechanical properties
11:10	Sabine Mönch Waste heat-based air conditioning of fuel cell railcars to increase minimum range	Esmari Maré Analytical determination of the geometrical properties of metal foams under compression	Satomi Takamatsu Relationship between Fabrication Conditions of Semi-solid Route and Morphology of Aluminum Alloy Foam
11:30	Christina Beltner PM shaping methods enabling efficient magnetocaloric technologies	Francisco Garcia-Moreno The foaming of metals unveiled by X-ray tomography	
11:50	Vicente Pacheco Energy harvesting from waste heat: powder metallurgical synthesis of thermoelectric materials	Ulrike Jehring Compression test on cellular metallic materials - Revision of DIN 50134	
12:10	Closing		
12:30	Lunch		
End: 13:30
